PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

5114

PROJECT NUMBER: TRAINING SESSION NUMBER: 2 OF 2
DATE OF SESSION: 02 AUG 88 DATE OF REPORT: 03 AUG 88
START: 0931 END: 1030
METHODOLOGY: CRV VIEWER IDENTIFICATION: 025

- Value: 2*
1. (S/NF/SK) MISSION: To access and describe the target, paying close attention to proper CRV structure. *Alotta Airlines Accident*
 2. (S/NF/SK) VIEWER TASKING: 6-digit encrypted coordinates: 557862/870721.
 3. (S/NF/SK) COMMENTS:
 - a. Inclemencies: None reported.
 - b. In this session, 025 began to realize that there were some perceptions pertinent to the site which may not be specifically pertinent to the tasking. A movement exercise was performed, moving from the "coordinate site" to the "tasked target". 025 has been requesting this kind of movement exercise lately, as it facilitates breaking from one aspect of the site and "moving" to another. This is not so much a movement in "space" or "time" (as is taught in training), but more of a movement in "concept". It is, however, a valid and apparently useful application of the movement exercise. It works very well, and should be considered for inclusion in the standard training package.
 - d. 025 was previously reluctant to call both AI and ADL breaks. 025 would often call a break, but virtually refuse to write it down. 025 has really improved in this aspect, declaring them and getting them onto paper.

Summary

The site is a water/land/structure/mountain interface. Outdoors feeling. The water has motion and there is short grass on the land. The site is somehow exhilarating. Then I focused on a structure or object that was dark, metallic, long and cylindrical which lead to the ADI breaks of cannons or tanks. The motion present is heavy, slow and progressive. Sparks of light are present and I believe that this site involves testing zones. The natural open components of the site are necessary for this process (air and water). Environmental sciences which involves specialized chemistry. Testing for reactive results. The environmental testing processes are being done to help life and people (reduce risks). I believe this site is ecological because the water and air is affected. The natural site is important in order for the experiments to occur. The results focus is to make something better or healthier for life and people. The orange and yellow sparks going through the air convinces me that this involves advanced sciences. Microscopic misty, clear, particles are released (perhaps substances) to be tested for experimental purposes.
